ROADS OF SOUTHEAST CHINA FROM CANTON TO HANG-CHOU

1-30-64

AS DETERMINED BY A STUDY OF THE LATEST AVAILABLE AERIAL PHOTOGRAPHY.

DATE OF STUDY: 20 JUNE 1955

LEGEND

- 1st Class Road: Roads are engineered with a graded surface in an apparent good state of repair. At least two lanes wide throughout. Represents the primary road of the area.
- 2nd Class Road: Roads are engineered for the most part with a graded surface in an apparent fair to good state of repair. Usual width is less than 15 feet with occasional narrow bottlenecks. The road is winding with steep grades in hilly or mountainous areas.
- 3rd Class Road: Local roads, normally one lane wide, suitable for limited use by motor vehicles.

MAP BASE: WAC 1:1,000,000 NO. 613, 614, 492, 493, 494 and 495.
